1. Highlights

1.1 Corporate profile

Yamada Green Resources Limited (山田绿色资源有限公司) ('Yamada' or the 'Company'), together with its subsidiaries (the 'Group'), is an agricultural food product processing group in Fujian Province, the People's Republic of China (PRC).

Serving a long-established customer base from Japan, Yamada has earned a strong reputation of providing high quality products to food distributors and wholesalers in Japan. Currently, Yamada's food processing operations, which adheres to stringent safety standards and requirements, are carried out at its main factory where it employs over 200 workers.

Yamada has also made considerable investments into office and logistics properties in China and Singapore, following the disposal of its bamboo, eucalyptus and parts of its mushroom plantations over the past few years. Rental from these properties will become a new source of income for the Group over the next few years.

Yamada was listed on the Mainboard of the Singapore Exchange on 8 October 2010. Shares of Yamada Green Resources have been suspended from trading since September 2017.

1.2 Message to stakeholders

On behalf of our Board of Directors, it is my pleasure to present our Sustainability Report for the financial year ended 30 June 2019 (**FY2019**).

Corporate Social Responsibility (**CSR**) plays an essential role in the long-term success of our business. It is important that we align our interests with that of the communities in which we operate in order to gain the support of the local communities and government agencies.

We share our customers' commitment to the protection of our environment and we believe in the importance of caring for our planet and encouraging others to play their part. Being one of the leading companies involving in agricultural business, we recognise our obligation and commitment to create a better living environment for our current and next generation.

Our Directors recognise the importance of being a responsible steward of the land we manage. With this objective, the Company has established a CSR policy which includes the review of the following areas of the Group's activities:

- (a) to review and recommend the Group's policy with regards to CSR issues;
- (b) to review the Group's environmental policies and practices;
- (c) to review the social impact of the Group's business practices in the communities that the Group operates in;
- (d) to review and recommend policies and practices with regard to key stakeholders (employees, business partners, customers, suppliers.); and
- (e) to review and recommend policies and practices with regard to regulators.

In our inaugural sustainability report, we will be reporting on the Group's sustainability efforts, comprising Regulatory Compliance, Food Safety, Environmental Sustainability, and Social Contribution.

In addition, we wish to confirm that the Board has considered sustainability issues as part of its strategic formulation, determined the material environmental, social and governance (**ESG**) factors and overseen the management and monitoring of the material ESG factors.

On behalf of the Board of Directors

CHEN QIUHAI

Executive Chairman and Chief Executive Officer

1.3 Scope of sustainability report

The scope of the report covers information on material sustainability aspects of Yamada and its subsidiaries, from 1 July 2018 to 30 June 2019 unless otherwise specified. This should sufficiently address stakeholders' concerns in relation to sustainability issues arising from the major business operations of the Group.

This report is prepared in accordance with the Global Reporting Initiative (**GRI**) Standards: Core Option as it provides a set of an extensive framework that is widely accepted as a global standard for sustainability reporting. It also considers the Sustainability Reporting Guide in Practice Note 7.6 of the Singapore Exchange Securities Trading Limited (**SGX-ST**) Listing Manual. In preparing our report, we applied the GRI's principles for defining report content and report quality by considering the Group's activities, impacts and substantive expectations and interests of its stakeholders.

The data and information provided within the report have not been verified by an independent third party. We have relied on internal data monitoring and verification to ensure accuracy.

1.4 Restatements

No restatements were made from the previous report.

1.5 Sustainability contact

We welcome your views and feedback on our sustainability practices and reporting at cy@ousei.com.

2. Our approach to sustainability

2.1 Sustainability organisational structure

Sustainability is a vital part of our corporate strategy for achieving long-term growth. The values we create for our people, the environment and society at large very much determine our financial performance. We developed a sustainability organisational structure to move things forward:

2.2 Sustainability strategy

At the Group, our sustainability strategy aims to create integrated values.

Together with disciplined execution of our strategy and a commitment to doing business responsibly, we commit to deliver value to all our stakeholders through the following:

The sustainable strategy is underpinned by our comprehensive and extensive internal policies that covers the areas above such as regulatory compliance, performance monitoring, occupational safety and health, employee training, waste reduction and employee welfare.

The strategy is also guided by external sources, including ISO 9001:2008 Quality Management System, ISO 22000:2005 Food Safety Management System, and Sustainability Reporting Guide in Practice Note 7.6 of the Singapore Exchange Listing Rules.

2.3 Consulting our stakeholders

We recognise the need to continuously develop our responsible business approach in order to address growing stakeholder expectations around our impact on the economy, environment and society.

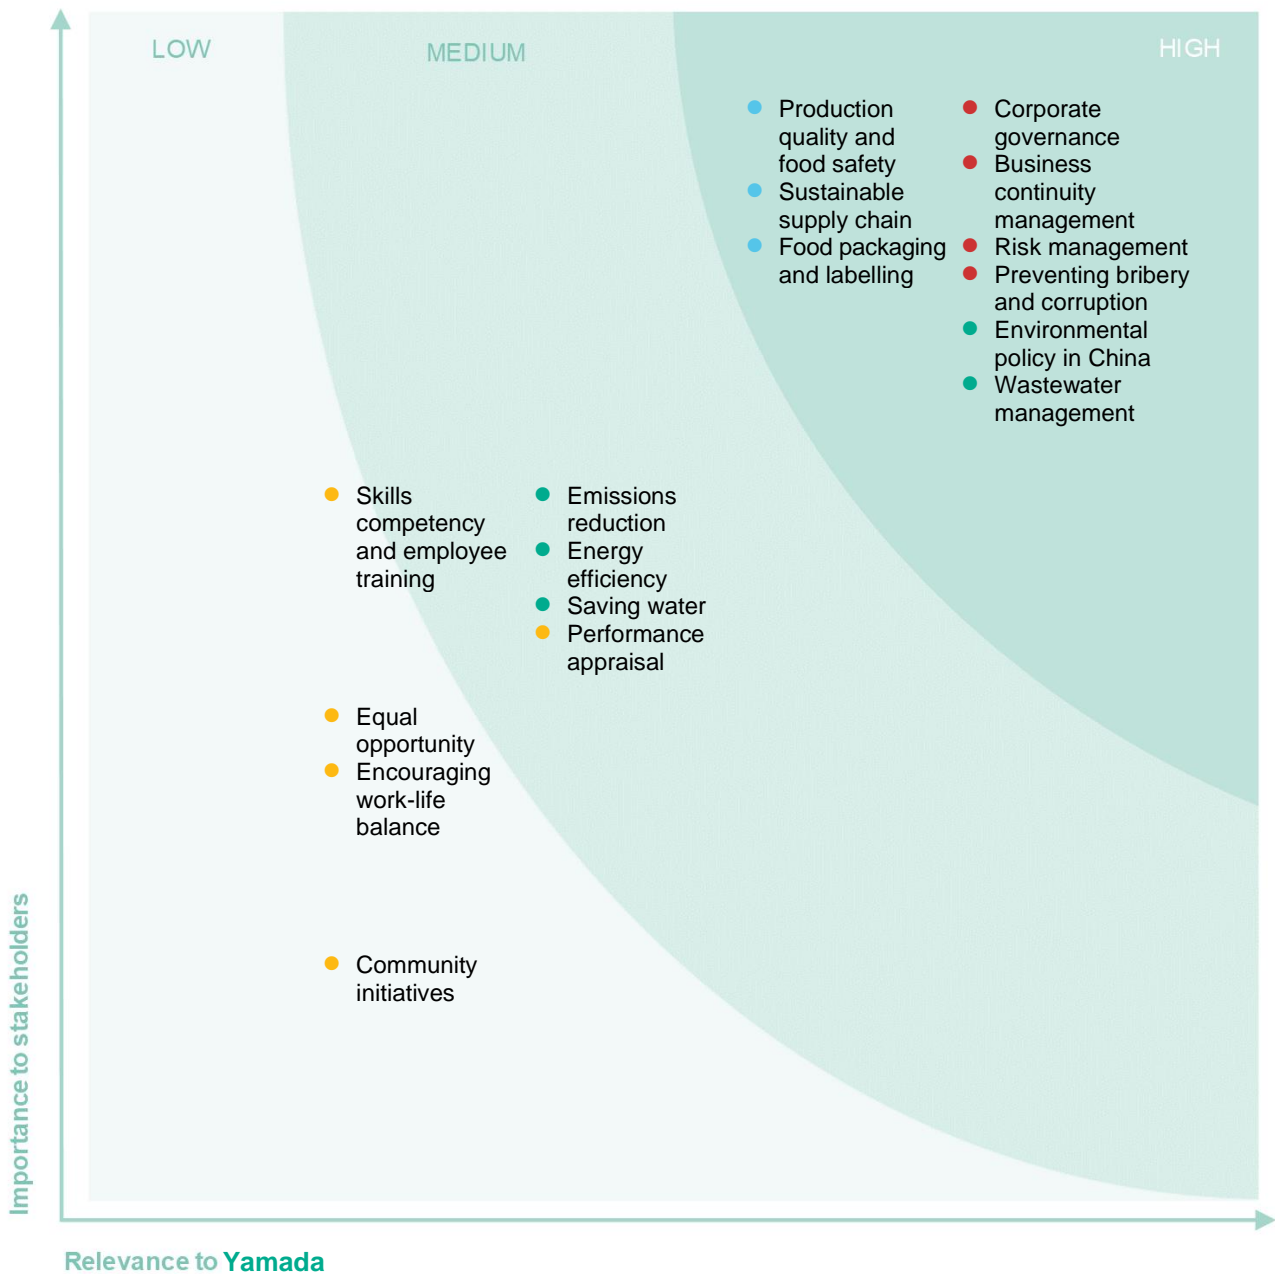

As such, we periodically consult with our stakeholders to determine the issues that are most relevant to them and the Group. An overview of our approach and rationale is set out below (with stakeholders listed in alphabetical order), together with the feedback we have received.

Stakeholders	How we listen	Why we do it	What you've told us
Customers	<ul style="list-style-type: none"> Focus groups with consumers Market survey on consumer tastes Feedback from distributors Inspection of company production lines 	<ul style="list-style-type: none"> Consistently improve product taste and innovation through market survey and R&D Include nutritional information on product packaging, where applicable Obtain the necessary food safety certificates from relevant authorities 	<ul style="list-style-type: none"> Quality food products that meets the expectations of the Japanese market Compliance with food safety and environmental laws and regulations
Employees	<ul style="list-style-type: none"> Informal feedback WeChat platform Employee bonding session 	<ul style="list-style-type: none"> Compliance with regulations Provide healthy work environment to ensure the well-being of all our staff 	<ul style="list-style-type: none"> Salary increment Improve employee welfare and benefits
Government and regulators	<ul style="list-style-type: none"> Understand relevant laws and regulations Interaction with government and industrial bodies Trainings and meetings 	<ul style="list-style-type: none"> Compliance with laws and regulations Uphold highest standards of corporate governance and ethical behavior Participation in government-related events 	<ul style="list-style-type: none"> Compliance with food safety and environmental laws and regulations Compliance with SGX regulations
Investors/ shareholders	<ul style="list-style-type: none"> Shareholders' meeting Board meeting Yamada website Regular updates and communication 	<ul style="list-style-type: none"> Consistently improve company's management Operate, manage and compliant against regulations Committed to delivering economic value to our capital providers through a strong financial performance and our methods of engagement with them 	<ul style="list-style-type: none"> Long-term profitability Achieve company targets Growing and development Compliance with laws and regulations
Suppliers/ business partners	<ul style="list-style-type: none"> Inspection of suppliers' production lines Interaction with supplier representatives Perform periodic supplier evaluation 	<ul style="list-style-type: none"> Build up strategic business relationship Compliance with food safety regulations 	<ul style="list-style-type: none"> Timely payment and adherence to agreement terms Compliance with food safety and environmental laws and regulations

2.4 Sustainability materiality

Using a materiality index, we align our responsible business priorities with the Group’s principal business and operational risks, as illustrated in the diagram below.

We have also developed metrics to help us measure our progress, as indicated in our sustainability scorecard in **Appendix A**. We will review and adjust the material issues and relevant metrics each year, as the external and business context changes.

3. Our performance

3.1 How we measure our performance

Our **sustainability strategy** is embedded into the appropriate parts of our business, with dedicated teams for each focus area, and coordination by our relevant departmental managers.

Progress will be tracked in two key ways: measuring performance against metrics, and evaluating how well the programs have advanced, through a series of 'commitments'.

Metrics and targets

We have established key performance indicators for each of the four focus areas outlined in our **sustainability strategy**. Periodically, we plan to introduce new metrics and update targets to ensure alignment with our strategy.

Commitments

To ensure we have a robust sustainability programme in place, we have included the key commitments for each area of our sustainability strategy. The progress we have made against each key commitment is indicated using the symbols shown in the table below.

We track and review our sustainability programme with the Board of Directors at least once a year.

Symbols used to indicate progress against commitments

Symbol	Meaning
	New commitment this year
	Not started
	In progress
	Complete
	Ongoing commitment: no end date

3.2 Regulatory compliance

Overview

To maintain a fair, ethical and efficient business and working environment, Yamada strictly adheres to the local laws and regulations relating to corporate governance, risk management, and code of conduct (including anti-money laundering, anti-corruption, fraud, and confidentiality).

Corporate governance

Yamada's Board of Directors (the '**Board**') recognises the importance of sound corporate governance in protecting the interest of the shareholders as well as strengthening investors' confidence in the management and financial reporting of the Group. We are committed to ensuring and maintaining a high standard of corporate governance within the Group. Good corporate governance establishes and maintains a legal and ethical environment, which helps to safeguard the interests of the shareholders of the Group.

The Group, through its Company Secretary, has updated the Board on relevant new laws and regulations affecting the Company. From time to time, and through Board meetings and other meetings, both formal and informal, our CEO has been advising our Directors of the changing commercial and business risks faced by the Group.

The Directors are also updated regularly with changes to the SGX-ST Listing Rules, risk management, corporate governance, insider trading and the key changes in the relevant regulatory requirements and financial reporting standards and the relevant laws and regulations to facilitate effective discharge of their fiduciary duties as Board or Board Committees members. New releases issued by the SGX-ST and Accounting and Corporate Regulatory Authority (**ACRA**) which are relevant to the Directors are circulated to the Board by the Company Secretary.

The Directors are encouraged to attend seminars and receive training to improve themselves in the discharge of Directors' duties and responsibilities. Changes to regulations and accounting standards are monitored closely by the Management. To keep pace with such regulatory changes, the Company provides opportunities for ongoing education and training on Board processes and best practices as well as updates on changes in legislation and financial reporting standards, regulations and guidelines from the SGX-ST Listing Rules that affect the Company and/or the Directors in discharging their duties. Such training costs are borne by the Company.

As part of our strategy, we will continually seek to be fully compliant with corporate governance rules and regulations, including relevant laws and regulations in the countries that we operate in, in relation to bribery, extortion, fraud and money laundering that have a significant impact on the Group.

FY2019 Progress

0

Incidents of non-compliance with corporate governance rules and regulations

0

Incidents of bribery and corruption

Business continuity management

As a responsible company, we believe that comprehensive emergency preparedness and response capabilities and business continuity plans demonstrate good governance, and are necessary for sustainability. Our plans help us protect personnel, facilities and neighboring communities in the event of natural disasters, security incidents, operational disruptions and other incidents.

Business continuity management is very important, especially in light of the two unfortunate incidents below, which happened to the Group in a span of less than a year:

- In August 2017, a large part of the historical financial records of all the subsidiaries of the Group were destroyed in a vehicle fire in the midst of transporting certain finance documents and IT/computer hardware from the Group's R&D Centre to the Group's office premises (the '**Fire Incident**'). Although management was subsequently able to substantially reconstruct the affected financial records, the FY2017 audit and results announcement were significantly delayed.

After the Fire Incident, we have further enhanced our controls to enforce daily offsite backup of all our financial records and other important information, and daily backup of our financial records to a cloud server. We have also communicated to relevant employees that transportation of physical documents and related computer equipment should be separately performed. This will ensure business continuity in the face of similar unfortunate incidents in the future.

- In August 2018, it has come to the Board's attention that two of our wholly-owned subsidiaries had disposed of all their leases to moso bamboo plantations (the '**Plantations**') in Jiangle County and Pucheng County, in Fujian Province, PRC (the '**Disposal Transactions**'). It was found that the disposal was not brought to the Board's attention previously and was made without the Board's approval. The Board, with the guidance of the Audit Committee, ordered an immediate investigation into the matter.

After a thorough investigation into the Disposal Transactions, it was found that the Plantations were disposed of by the legal representatives of the two wholly-owned subsidiaries as the Plantations have been facing problems including rising labour cost, pest infestation, outstanding maintenance fees and poor market conditions in FY2016 and FY2017. These operations difficulties have been periodically reported to management in FY2016 and FY2017. However, it was established that an inadvertent communication breakdown between the legal representatives and our previous Executive Director, Mr. Lin Weibin, ultimately led to the Disposal Transactions in August 2017. For more details, please refer to our announcement on the SGX website on 28 January 2019.

Following the review of the investigation findings, the Board had spoken to our previous Executive Director, Mr Lin Weibin, and following the discussion, Mr Lin had tendered his resignation as a director of the Company. He has also stepped down as vice-chairman of the board of Fujian Wangsheng Industrial Co., Ltd. and legal representative of Nanping Yuanwang Foods Co., Ltd., both wholly-owned subsidiaries of the Company.

After the Disposal Transactions, we have further enhanced our controls by consolidating all Company seals in the China headquarters in Fuzhou, PRC for proper safekeeping in a fireproof safe. The Company seals can only be used in conjunction with proper management authorisation on the Seal Usage Approval Form. This will ensure that major contracts can only be effected with the explicit consent from the Executive Directors. In addition, the Company has adopted a formal management reporting system to ensure that all major incidents are timely reported. This will prevent the reoccurrence of similar incidents in the future.

Risk management

As a responsible business, we view risk management as one of our most important responsibilities to our customers, suppliers, employees, and regulators. We are committed to developing the appropriate systems, policies, procedures, arrangements and controls to ensure effective risk management is exercised and promoted within our Group culture. We believe in appropriate training of our staff and communication with our clients as requisite to fulfilling our risk management goals.

Our risk management practices cover strategic, financial, operational, compliance and information technology risks associated with the Group.

We view our risk management policies and procedures as dynamic in response to the evolution of our business strategies, the development of our business and the innovation within our industry. We will strive to improve our risk management capabilities and processes to stay abreast of market best practices. We believe effective risk management is crucial to the long-term success of our business.

Our four cornerstones of effective risk management and sound internal controls are –

- The role of the Board in its oversight of risk management policies and their implementation;
- The role of Senior Management in ensuring that sound policies, effective procedures and robust systems are in place;
- The presence of sound risk management processes and operating procedures that integrate prudent risk limits with appropriate risk measurement, monitoring and reporting; and
- The presence of competent personnel in the firm's compliance, controls, risk management, and audit functions.

Preventing bribery and corruption

The Group prohibits all forms of bribery and corruption. The Group requires all employees to strictly abide by professional ethics and eliminate any corruption and bribery. All employees are expected to discharge their duties with integrity, to act fairly and professionally, and to abstain from engaging in bribery activities or any activities, which might exploit their positions against the Group's interests.

Whistle-blowers can report verbally or in writing to the senior management of the Group for any suspected misconduct with full details and supporting evidence. The management will conduct investigations against any suspicious or illegal behaviour to protect the Group's interests. The Group advocates a confidentiality mechanism to protect the whistleblowers against unfair dismissal or victimisation. Where criminality is suspected, a report is made to the relevant regulators or law enforcement authorities when the management considers necessary.

Commitments: Regulatory compliance

Full compliance with corporate governance rules and regulations, including relevant laws and regulations in the countries that we operate in, in relation to bribery, extortion, fraud and money laundering that have a significant impact on the Group

Achievements

- Zero incidents of non-compliance with corporate governance rules and regulations
- Zero incidents of bribery and corruption

FY2019 progress

- Focusing on having strong controls over corporate governance, business continuity management, risk management and prevention of bribery and corruption, we continue to achieve zero incidents of non-compliance with corporate governance rules and regulations and zero incidents of bribery and corruption since we started tracking this statistic in FY2018.

3.3 Food safety

Overview

Food safety and quality are core to our commercial reputation and consumers' expectations. We are committed to responsible sourcing as it helps assure safety and quality of our end products.

Production quality and food safety

We are deeply committed to production quality and food safety. This is evidenced by the ISO 9001:2008 Quality Management System and ISO 22000:2005 Food Safety Management System certifications over our production facilities.

We are also expected to comply with relevant regulatory requirements under the Food Safety Law (食品安全法), Measures for the Administration of Export Food Hygiene (出口食品卫生管理办法), and Provisions on the Administration of Hygiene Registration and Filing of Export Food Producing Enterprises (出口食品生产企业卫生注册登记管理规定).

Our quality control teams are committed to hygienic and safe production. The teams undergo regular food safety management training to maintain awareness and management of food safety risks, and are responsible for ensuring quality control of our products.

Our operations are audited regularly to monitor management and performance relating to hygiene, sanitation and 'good housekeeping'. We recorded no incidents of non-compliance with regulations and voluntary codes concerning the health and safety impacts of products. High standards of manufacturing help minimise exposure to risks that may affect product quality.

When we manufacture our products, we ensure high quality using stringent process controls to ascertain product quality and prevent contaminants from entering the production process. All our products passed the tests required by the Chinese national food safety standards.

In FY2019, we have zero food safety incidents and non-compliance with laws and regulations on food safety. As part of our strategy, we will continually seek to continue this track record in the coming years.

Food packaging and labelling

Our food products are packaged using approved food-grade materials. Packaging materials comply with the Chinese policy on producer responsibility.

Our marketing practices comply with Chinese regulations. Information on our food production permit number and the ingredients and nutritional values of each of our branded products sold domestically is provided on the food label printed on the packaging.

In FY2019, we have zero non-compliance with laws and regulations on product and service information and labelling, and marketing communications. As part of our strategy, we will continually seek to continue this track record in the coming years.

FY2019 Progress

100%

Production facilities that are ISO-certified

0

Incidents of non-compliance with laws and regulations on food safety

0

Incidents of non-compliance with laws and regulations on product and service information and labelling

0

Incidents of non-compliance with laws and regulations on marketing communications

100%

Purchases from local suppliers

Sustainable supply chain

Close to 100% of our purchases are from reliable local suppliers in the PRC. We believe that a secure and stable supply chain is very important to ensure the smooth and uninterrupted operation of our production activities. To further ensure that our supply chain is primed for long-term food security, community resilience, and environmental sustainability, we actively work with our partners to achieve the following:

Securing long-term supply

Since 2008, we have entered into the necessary leases to secure our shiitake mushroom cultivation bases to ensure the supply of self-cultivated shiitake mushrooms.

We also entered into agreements with the respective farm contractors to procure individual farmers to provide the following labour services for our shiitake mushroom cultivation bases:

- (i) farming (mainly daily maintenance, harvesting, sorting, transportation, etc.);
- (ii) construction of cultivation tentage outer structure; and
- (iii) installation of shading net.

Under the terms of the agreement, the farmers will be remunerated based on the volume of all the harvested shiitake mushrooms from their farmland.

Zero fertiliser

As part of our environmental protection initiatives and for the purposes of ensuring the natural taste of our self-cultivated shiitake mushrooms, we do not use fertilisers in the cultivation of our shiitake mushrooms. As a testimony of our above efforts, we have received the certificate of “Organic Product” for fresh self-cultivated shiitake mushrooms.

Natural irrigation

We select locations such as mildly sloping small valleys or similar geological structures surrounded by mountains to establish our shiitake mushroom cultivation bases which allow for natural irrigation. The irrigation system in our cultivation bases is built with furrows located between the rows in the field where the synthetic logs are placed. Irrigation water flows along the furrows down the slope throughout the field.

The irrigation system in our cultivation bases is customised to receive natural spring water for irrigation while minimising the environmental impact.

Developing win-win partnership

In order to ensure the quality of our shiitake mushrooms, we have developed genetically improved mycelia by collaborating with Fujian Agricultural and Forestry University (Mycological Research Centre)(福建农林大学菌物研究中心). Mycelia will be inoculated into the synthetic logs, the substrate on which shiitake mushrooms grow. We will only procure synthetic logs that meets our quality requirements and specifications.

As part of our quality assurance policies, we will conduct pre-cultivation briefings to representatives of the individual farmers procured by the respective Villagers' Committees to familiarise them with, among others, key stages in the growing process of our shiitake mushrooms and necessary techniques involved throughout the whole process. Individual farmers are required to closely control and monitor conditions such as temperature, humidity, ventilation and lighting during the growing process of our shiitake mushrooms.

Meanwhile, our cultivation technicians will provide technical training and guidance to the individual farmers and conduct regular as well as random quality checks on our cultivation bases.

Commitments: Food safety

Full compliance with ISO9001:2008 (Quality Management Systems) and ISO22000:2005 Food Safety Management System

Achievements

- All our factories are ISO9001:2008 and ISO22000:2005 certified.

FY2019 progress

- All our factories are ISO9001:2008 and ISO22000:2005 certified.
- All ISO audits are conducted by accredited ISO consultants. We shall continuously improve based on the recommendations provided by the ISO consultant.

Full compliance with food safety, packaging and labelling laws and regulations

Achievements

- Achieved full compliance with food safety laws and regulations.
- Achieved full compliance with product and service information and labelling laws and regulations.
- Achieved full compliance with marketing communications laws and regulations

FY2019 progress

- We are fully compliant with food safety, packaging and labelling laws and regulations.

3.4 Environmental sustainability

Overview

Environmental protection laws are strictly enforced in China. As one of the leading suppliers of fresh and processed agricultural products in China, we are committed to ensuring our full compliance with national environmental regulations.

Comprehensive policies are developed to ensure our commitment towards environmental protection, reducing carbon emissions, preventing pollution, and minimising waste can be achieved during our daily operations.

Environmental policy in China

Environmental policy in China is set by the National People's Congress and managed by the Ministry of Environmental Protection of the People's Republic of China. The central government issues strict regulations for which the actual monitoring and enforcement is largely undertaken by the local governments.

In January 2015, a new environmental law came into effect, covering land, water and air pollution. It contains strict penalties, including seizing of the property of illegal polluters, with company executives subject to prison sentences of 15 days. There is no upper limit on fines. More than 300 different groups will be able to sue on the behalf of people harmed by pollution.

Yamada is fully compliant with China's environmental policy. As part of our strategy, we seek to continue to be fully compliant with China's environmental policy with zero environmental incidents and zero fines on contravention of environmental regulations.

Emissions reduction

The corporate culture of protecting the environment is reflected in every operation undertaken by the Group.

We are committed to positive action on climate change and are dedicated to reducing the carbon emission in our daily operations. Employees are reminded to save electricity and fuel consumption through regular internal communications.

To determine the carbon footprint, we collect energy usage data from each our businesses and then calculate our total annual greenhouse gas emissions.

In FY2019, the Group generated a carbon footprint of 2,745.9 tonnes of carbon dioxide emission (**tCO₂e**) with a carbon emission intensity of 59.3 kgCO₂e per square metre of factory floor area, representing a 39% increase from the previous year. The emission mainly arises from purchased electricity used in the production process, which accounted for close to 83% of the total carbon emission of the Group.

The increase in carbon footprint intensity is mainly due to higher electricity consumption during production and additional consumption from our tenants in the factory building.

FY2019 Progress

0

Environmental incidents

¥0

Fines on contravention of environmental regulations

59.3kgCO₂e

Carbon emission intensity per square metre of factory floor area

5.4m³

Water consumption intensity per square metre of factory floor area

4.6m³

Wastewater discharge intensity per square metre of factory floor area

100%

Wastewater discharge that meets local emission standards

We follow the Greenhouse Gas Protocol established by the World Resources Institute and the World Business Council for Sustainable Development, the standard manual for measuring corporate greenhouse gas emissions. Using the “control method”, we include 100% of the emissions associated with businesses which we directly control. Our carbon footprint includes:

- All fuels used directly by our companies (Scope 1 emissions)
- All purchased electricity used in our facilities (Scope 2 emissions)
- Impact of business air travel, and transportation of goods to our customers (optional Scope 3 emissions)

We recognise that reducing carbon emissions in our daily operations has a positive effect on climate change. As such, Yamada has committed to maintain our carbon footprint, from a FY2019 baseline.

Energy efficiency

Due to our production activities, direct fuel and electricity constitutes a significant proportion of our operating expenses. By investing in energy efficiency, we not only help protect the environment but can also lower our financial costs.

To ensure the effective use of electricity, the Group conducted the following practices:

- Using energy-saving vehicles and equipment
- Regular maintenance of production equipment, especially boilers, to maintain high energy efficiency
- Turn off lights, computers and air conditioning system before clocking out
- Place energy saving reminder labels next to switches
- Clean office equipment (such as refrigerator, air-conditioner) regularly to maintain high efficiency

Wastewater management

Wastewater is passed through an in-house wastewater treatment facility fitted with biological treatment tanks. In addition, the municipal environmental protection bureau obtains wastewater samples from the facility at least four times a year to ensure that discharge standards are met. As a result, the treated wastewater discharge will be able to meet the requirements of the water emission standard of the Fujian Province.

In FY2019, the Group had a wastewater discharge intensity of 4.6m³ per square metre of factory floor area. As part of our strategy, we seek to continue to ensure that 100% of our wastewater discharge meet the local emission standards.

Saving water

Water scarcity is a growing concern around the world and a serious global challenge that we must work together to address. This is even a greater concern to us, given that water is also an essential input in the food industry, from cleaning and sanitation to manufacturing.

In FY2019, the Group had a water consumption intensity of 5.4 m³ per square metre of factory floor area. Where possible, the Group already has procedures in place to reduce water usage in our production lines. Our employees are also reminded of the importance to save water in their daily activities.

We will continue to track and monitor the performance on the wastewater discharge and water consumption. Progress and performance improvement will be reported every year.

Commitments: Environmental sustainability

Full compliance with environmental laws and regulations

Achievements

- Achieved zero environmental incidents and zero fines on contravention of environmental regulations.

FY2019 progress

- We are fully compliant with China's environmental policy with zero environmental incidents and zero fines on contravention of environmental regulations.
- 100% of wastewater discharge meets local emission standards.

Maintain carbon footprint per square metre of factory floor area (from a FY2019 baseline)

Carbon footprint intensity (kgCO₂e)

FY2019 progress

- 39% increase in carbon emission intensity from the previous year.
- Increase is mainly due to higher electricity consumption during production and additional consumption from our tenants in the factory building.

Track and monitor our performance on wastewater discharge and water consumption

Wastewater discharge intensity (m³)

FY2019 progress

- Yamada had a wastewater discharge intensity of 4.6m³ per square metre of factory floor area, representing a 4% decrease from the previous year. Decrease in wastewater discharge is in line with the decrease in water consumption.
- Yamada had a water consumption intensity of 5.4m³ per square metre of factory floor area, representing a 5% decrease from the previous year. Decrease in water consumption is due to greater awareness amongst our employees to conserve water in their daily activities.

Water consumption intensity (m³)

3.5 Social contribution

Overview

Employees are the integral part of our competitive advantage and our sustainability agenda. We strive to invest in training and create an enjoyable working environment to our employees. Our human resources team develops, evolves and champions our human 'capital' through training, evaluation, remuneration, and engagement.

Through our people, we are also committed in making positive contributions to our community by giving back to the society and helping the less privileged.

Skills competency and employee training

To ensure that our employee excel, we emphasise on continuous learning in the workplace. Every employee has equal opportunities to upgrade and sharpen their skill sets through formal and on-the-job internal training programs.

The Company also emphasises on internal leadership development, and places great importance on developing a network of new-generation leaders who would play an important role in driving the business in the future.

In FY2019, the Group invested an average of 12 hours of training on each operational staff. We seek to continue this practice in the coming year.

Performance appraisal

To ensure the Company achieves its goals, we have various performance appraisal methods in place to determine the performance of the Company as well as each individual employee.

The employee performance appraisal comprises mainly quantifiable evaluation criteria. In addition, we actively collect performance information for each employee each month through inputs from direct supervisors and feedbacks, as well as periodical employee communication sessions.

These collected information allow us to understand the performance and skills development needs of each team and individual employee from multiple aspects. This is crucial for the Company to develop annual training programs for employees that are designed to enhance their skills and improve overall productivity.

In FY2019, all of our employees are at least subject to an annual performance appraisal by their superiors. We seek to continue this practice in the coming year.

Equal opportunity

We have always been an equal opportunity employer to provide a fair workplace for employees, following the principles of equality and non-discrimination. Recruitment, remuneration, promotion, and benefits are required to be handled based on objective assessment, equal opportunity and non-discrimination regardless of gender, race, marital status, pregnancy, disability, age or family status.

We attract talent through fair, and flexible recruitment strategy that includes recruitment application, job description, job applications, interview, selection, approval, and job offer. Promotion is based on performance and suitability.

FY2019 Progress

12

Training hours per operational staff

100%

Employees subject to regular performance appraisal

61%

Female representation in workforce

We offer competitive remuneration to attract and retain talented staff members. Remuneration packages (which includes the necessary social benefits) are reviewed periodically to ensure consistency with employment market. Dismissal also complies with employment laws and regulations relating to non-discrimination.

In FY2019, female employees comprise 61% of our entire workforce. We will continue to track and monitor female representation in our workforce and report these statistics every year.

Encouraging work-life balance

To enhance employee teamwork and cohesion, improve employee health and improve employee work-life balance, the Group has been organising periodic employee gatherings during major festivals and sports competitions. This helps the employees relax their mind and body, develop teamwork, explore their talent, so as to develop a positive attitude in both work and life.

Commitments: Social contribution

Achieve minimum of 12 hours of training per operational staff

Training per operational staff (Hours)
